

Fertilizer Spreaders / РАЗБРАСЫВАТЕЛИ УДОБРЕНИЙ

Mounted Fertilizer Spreader - **Vibration**

Устанавливается Разбрасыватель Удобрений -

General Features :

The centrifugal manure spreader machine is connected to the tractor with a three-point suspension system. The machine works by means of a shaft moving from the tractor tail shaft. Fertilization amount adjustment can be made on the tractor by means of hydraulic adjustment system. Equal fertilization is provided on both sides thanks to specially designed outlet openings.
