Working depth	cm	20	20	20	20	20
Knife	pcs	48	54	60	66	72
Weight	kg	770	890	1000	1100	1195
Power	hp	50-60	55-65	75-85	85-95	95-105

#### General Features / Общие Характеристики

Rototiller is a PTO driven machine, easily attached to 3-point hitch of tractor. It provides best solutions for cultivating large fields. It is a multi-purpose tillage machine used for preparing seed-beds, stubble ploughing in farms and vineyards. It quickly cultivates, loosens and aerates the soil. While front shanks turns over the earth in depth, reinforced rotor blades crumbles the clod, the large diameter roller firms the seed-bed and rear hood grades the surface. It also mixes the trashed residue with soil and helps fast decomposition for better humus. This new brand machine makes ready to go the field in one pass, saves time and fuel.
